

## **Ersem Manisa Received Safe Workplace Certificate**

**Ersem Manisa, one of the OYAK Mining Metallurgy companies was entitled to receive the "Safe Workplace Certificate" organized by the Yunusemre District Governorship in line with the decision taken in the Manisa Governorship Provincial General Hygiene Board. Ersem Manisa, one of the four facilities of Erdemir Steel Service Center (Ersem), had become the first company in its sector to have TSE Covid-19 Safe Production Certificate.**

Continuing its activities under the guidance of national and international standards, Ersem Manisa added a new one to its certificates. In line with the decision taken by the Governorship of Manisa Provincial General Hygiene Board, a "Safe Workplace Certificate" has been given to businesses / institutions that have been determined 3 times as a result of the inspections made and documented with reports, due to their sensitive, self-sacrificing and exemplary practices in the control of the pandemic. Ersem Manisa, who successfully passed the inspections performed at intervals of 4 times throughout Manisa, was also entitled to receive the "Safe Workplace Certificate". Atilla Kantay, Yunusemre District Governor, who visited Ersem Manisa facilities on Friday, 18 December, presented the "Safe Workplace Certificate" to Ersem General Manager İbrahim Özbunar against Covid-19. Acting in line with the guidelines of relevant institutions, especially the World Health Organization, Ersem Manisa has implemented a series of practices that prioritize the health of its employees and stakeholders, along with creative and good practices for distance, hygiene and mask use in all common areas. With the good practices implemented, the motivation of the employees was kept high by making them feel safe in the workplace.

Having received the TSE Covid-19 Safe Production Certificate on June 30, Ersem Manisa, the first steel service center in its sector to receive the certificate, has once again documented its compliance with reliable and hygienic production standards by obtaining the "Safe Workplace Certificate". Measures taken since the beginning of the pandemic process in OYAK Mining Metallurgy companies continue to be effectively maintained.
